

Vladimir Ananiev

The Creative One

Profile

Creative specialist with versatile experience in videography, editing, motion design, photography, and streaming. I handle the full production cycle — from idea and script to shooting, editing, and colour grading. I'm a team player and communicate easily with clients and talent.

Not only that, but I work with both digital and film photography, basic sound design, voice-over, and visual effects. My background in web development helps in technically complex projects.

For more than a decade, I've also been developing tabletop role-playing systems — designing mechanics, balancing progression, building narrative structures, and guiding player groups through complex story-driven campaigns. This experience strengthened my skills in storytelling, improvisation, clear communication, creative problem-solving, and structuring information.

I also have strong skills in voice acting — working with tone and expression, voicing characters, and delivering engaging narration.

Experience

Eden landing

Sept. – Nov.2025

Project. Web-development & motion design
